

Puzzle Sight Words

PREPARATION

Sort pieces so that each sight word is separate. (Check that they all fit, some letters are repeated and will only fit into specific words.)

PLAY

#1 Lay out the sight words right next to the letters needed to make the word. Mix the letters up a bit and have your little one put the “puzzle” together to match the card.

#2 Lay out the sight word cards. Mix up all of the letters and have your little one create the words by finding the letters in the pile.

#3 Mix up all the pieces and ask your little one to make words from the pieces available. This is a good one if you’ve already practiced these words quite a bit.
