

# Lego Game Directions

1. Pick a person. Mini Figures will stand better if you put them on a Lego brick.
2. Have a Lego pile nearby. I found that filling a bowl with Legos was easier than using our big Lego box.
3. Everyone takes 20 Legos to start.
4. Put another 20 Legos in the 'Pond'.
5. Choose a player to go first.
6. The first player rolls the die and moves that amount of spaces.
7. Follow the directions on the square that you land on.
8. When the first player has finished pass the die to the left.
9. Continue play until you reach the finish line.

I left finishing the game open-ended. I'll suggest a few possible endings but do what works for your family. Get creative and have fun with it.

- Count your Legos. Then talk about who has the most, the least, does anyone have the same? (See what I did there? Added in a little [math](#) and took out the "winner".)
- Set a timer for 3 minutes and see what you can build using only the Legos in your pile.
- Build. Trade pieces grab from the pile. If your kids are like mine they already have something started anyway.
- Have the players work together to build something using all the Legos.
